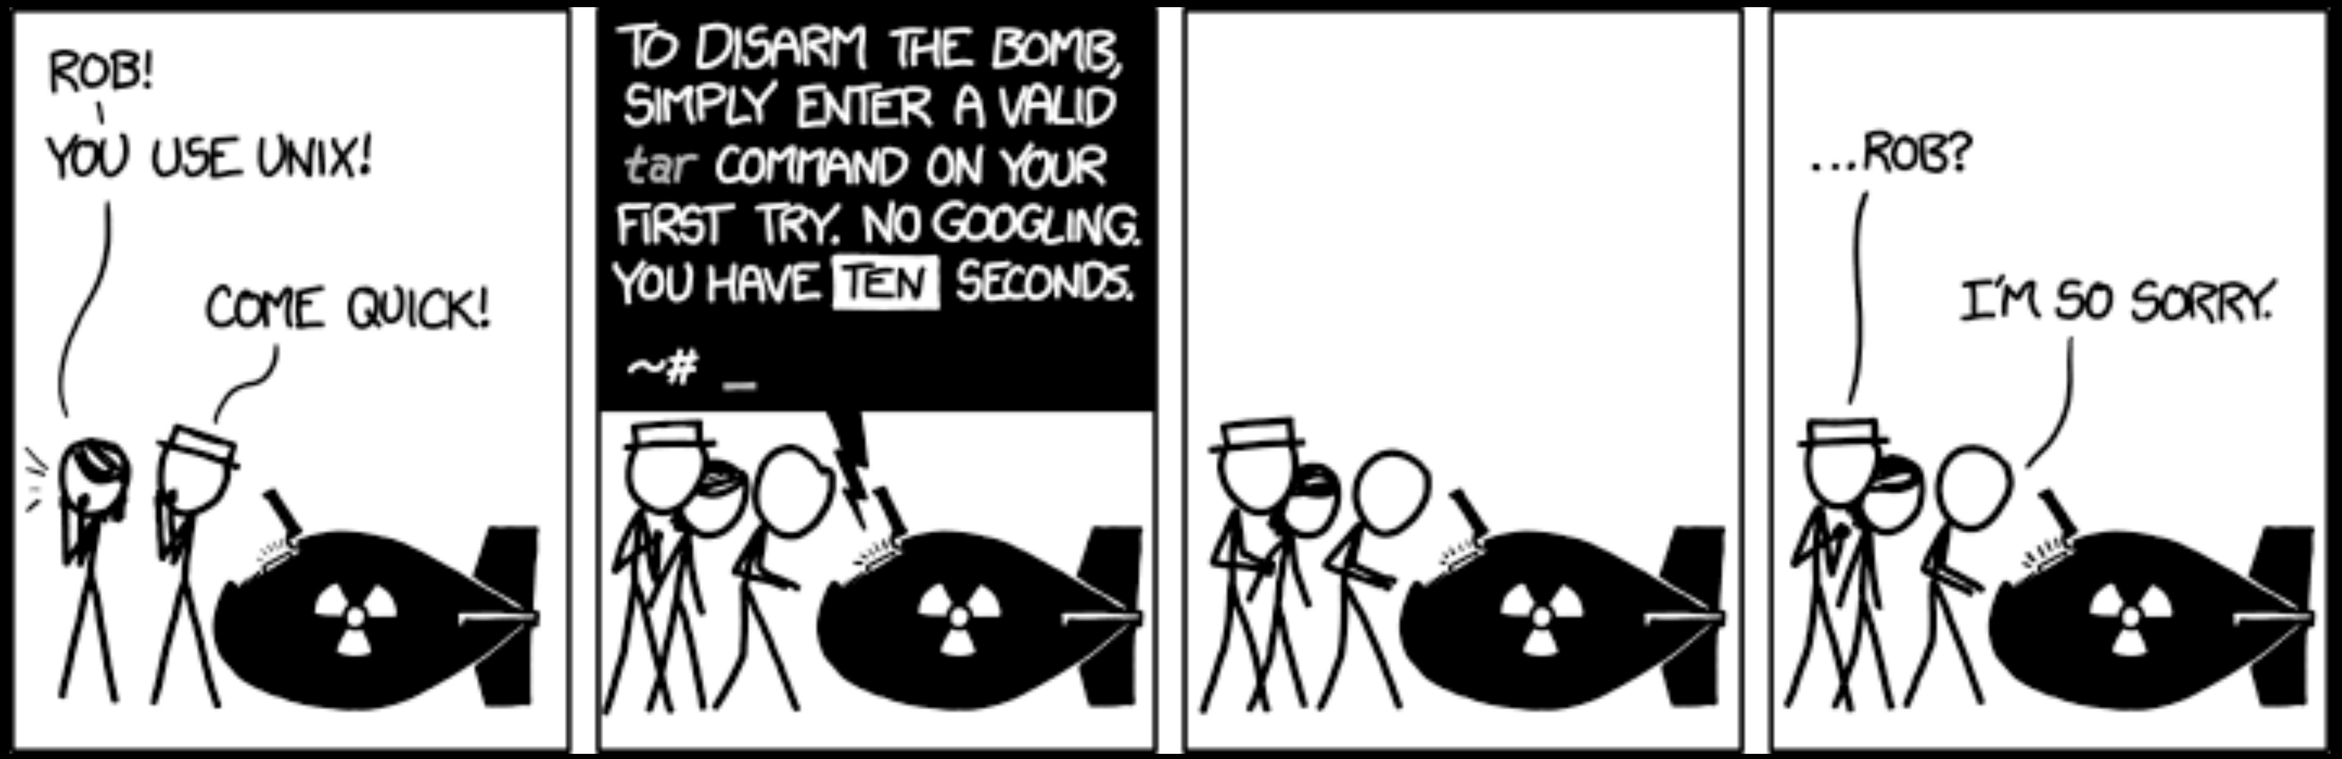
github.com/trending

is how people vote for software

how2

stackoverflow from the terminal

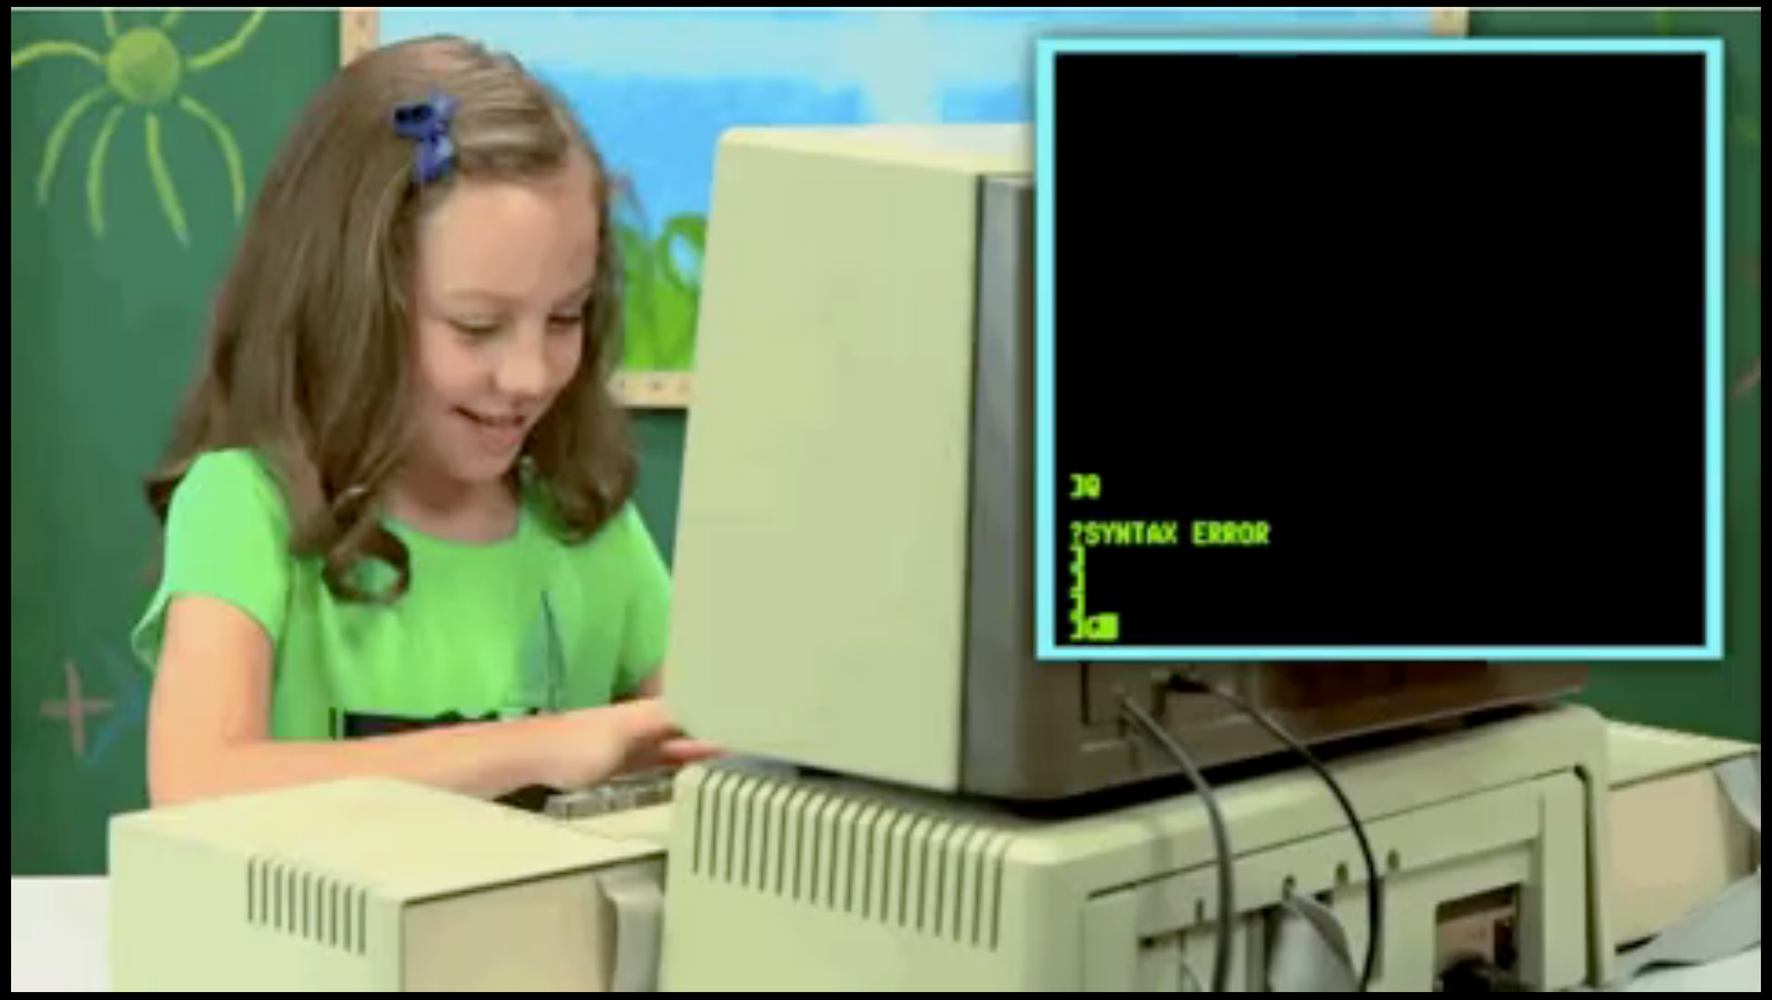
Claudio Santini santinic/how2



XKCD comics/tar.png

how2

- simple and friendly



]10
?SYNTAX ERROR
]

how2

- simple and friendly
- minimizes distraction & context switching

how2

- simple and friendly
- minimizes distraction & context switching
- natural language queries

how2

- simple and friendly
- minimizes distraction & context switching
- natural language queries
- language-specific search

how2

- simple and friendly
- minimizes distraction & context switching
- natural language queries
- language-specific search
- open-source

how2

- simple and friendly
- minimizes distraction & context switching
- natural language queries
- language-specific search
- open-source
- readable & easy to follow code

demo

few notes…

- hasn’t been updated for a while
- needs small tweaks
- features test coverage
- runs in Docker container
- ptsurbeleu/how2

pretty-algorithms

Pretty algorithms with modern JS and beautiful tests

Jiayi Hu jiayihu/pretty-algorithms

pretty-algorithms

- well written, documented and tested

pretty-algorithms

- well written, documented and tested
- real-word usage examples

pretty-algorithms

- well written, documented and tested
- real-word usage examples
- builds on top of its own code

pretty-algorithms

- well written, documented and tested
- real-word usage examples
- builds on top of its own code
- tested using Jest & snapshots

pretty-algorithms

- well written, documented and tested
- real-word usage examples
- builds on top of its own code
- tested using Jest & snapshots
- clarity & simplicity

pretty-algorithms

- well written, documented and tested
- real-word usage examples
- builds on top of its own code
- tested using Jest & snapshots
- clarity & simplicity
- ES6/TypeScript

demo

few notes…

- not very active recently
- high quality
- features rigorous test coverage
- Docker-friendly

hotel

A simple process manager for developers

Typicode typicode/hotel

Oh, uhh

hotel

- manages & monitors your apps

hotel

- manages & monitors your apps
- developer-friendly

hotel

- manages & monitors your apps
- developer-friendly
- local domains & wildcard subdomains

hotel

- manages & monitors your apps
- developer-friendly
- local domains & wildcard subdomains
- any server & platform of your choice

hotel

- manages & monitors your apps
- developer-friendly
- local domains & wildcard subdomains
- any server & platform of your choice
- test coverage and CLI support

hotel

- manages & monitors your apps
- developer-friendly
- local domains & wildcard subdomains
- any server & platform of your choice
- test coverage and CLI support
- easy to customize or enhance

demo

few notes…

- moderately active
- reasonably sized code-base
- self-signed certificates
- use locations
- ptsurbeleu/hotel

be nice, help others & keep learning
